Project management:

ALVIT – innovation and education, presented the idea, aims, and goals of the project meeting to all partners. Also presented the Agenda, that was sent in advance via mail, as well as handed at place. Tasks for each partners, as well as project’s aims were stated, discussed, and clarified. Each of the partner shall prepare a block stated on the flipchart regarding safe use of internet and understating the context of HOAX, for the final guide that will be summarized and published. Each partner was asked to write down the collected tools in english, since it is a common lagueage for all partners.

The main aim of the meeting in Ostrava was to introducing methodes of safe usage of internet to partners. Partners carrefully prepared presentations which were presented to all participants, brought materials that was shared among participants.

After the block of presentations, ALVIT – innovation and education, presented different tools and games that are used in prevention of cyberbullying. These will be summarized, translated and become a part of the publication at the end of the project. The point for the final dates of upcoming meetings and activities were discussed. Partners are supposed to decide and finalise the number of participants for meetings, in fair advance for the smooth course. The way of communication was also discussed, and agreed on the e-mail exchange.

Having done the management part, all the partners and participant were warmly welcome to enjoy the cultural part. All participants visited a cultural exposition with the ICT exhibition and others interesting points of view.
